MAKING  
**INDIA**  
SMART

## ABOUT US

- **Legal Name** : DEARNEST
- **Incorporated** : April 2022
- **Location** : Bangalore
- **Primary Focus** : R & D on Smart IoT Based Products.
- **No Chinese server**, our own server established in the Mumbai zone powered by AWS Amazon which makes it safe & secure.
- 100 % Designed & Developed **in India**.
- **Best Quality** with 10 Years Warranty.

### Our Vision

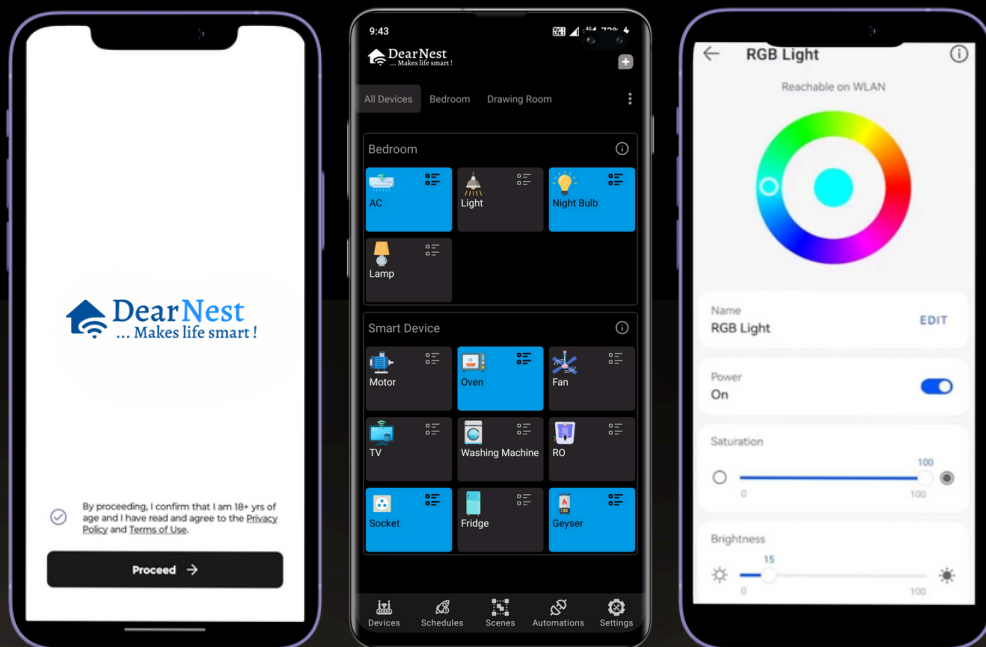

*“To be the leading manufacturer in segment of smart products.”*

### Our Mision

*“Without Compromising Quality,  
To provide most affordable, reliable & secure home automation solutions.”*

## All in One Mobile App For Home Automation

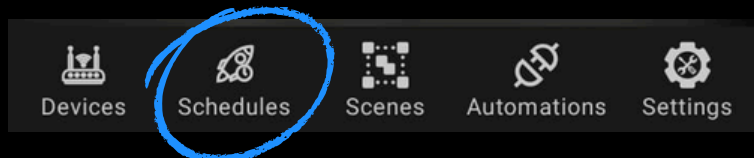

- Control From any Where in the world
- Time Management and Scheduling
- Device Grouping
- Custom Scene Creation
- Device Sharing With Family
- Third Party Integrations (Alexa & Google Voice)
- Over the Air (OTA) firmware upgrades

DEARNEST CLOUD SERVER (HOSTED OVER AWS MUMBAI, INDIA)

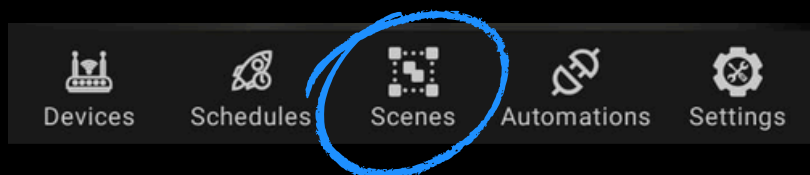

# POWERFUL SCHEDULE

Switch ON/OFF any or group of Electrical Appliance at a given absolute time with configuration for:

- One time (Eg. 6:30pm)
- Repeat on specific day(s) of the week (Eg. 6:30pm on Mon, Tue, Sat)

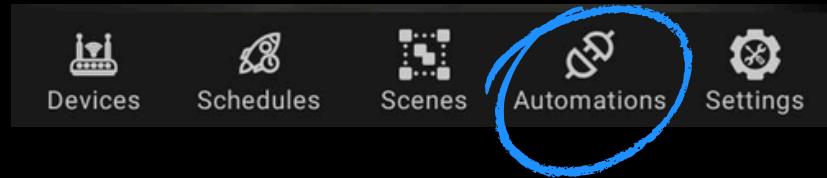

# CUSTOM SCENES

**Scenes** in our App enable seamless control of multiple appliances with a single command, enhancing convenience and efficiency in smart homes and industrial setups. Users can personalize scenes like "Movie Night" or "Work Mode" without manual adjustments, automating actions via Alexa or Google Assistant.

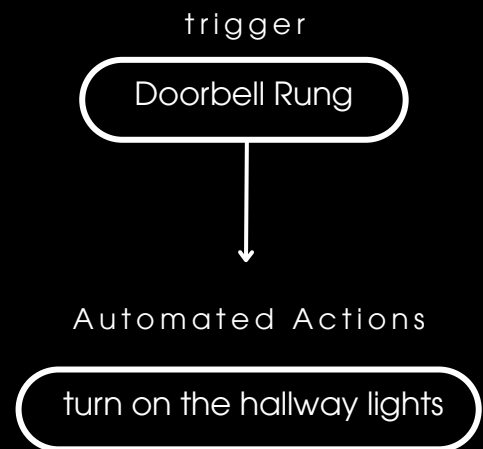

# AUTOMATION IN TRUE SENCE

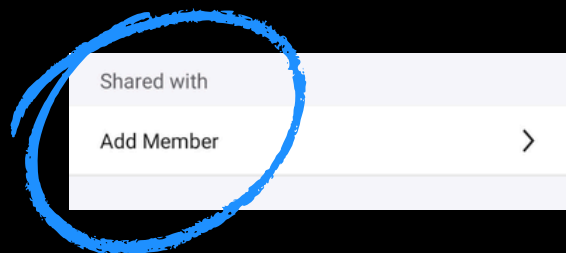

**Automation** allows users to configure conditional logic between Switches, such that when certain Switch is triggered, a set of switches are automatically triggered on one or more devices.

— e.g., "If Doorbell rung, turn on the hallway lights."

## SHARING CONTROL

There are often situations where others also need access to the **same room**. For example, you may want to grant family members control over rooms, temporarily provide a tenant or maid access to a door lock, or allow multiple employees to remotely access a shared hardware resource. To accommodate such use cases, DearNest offers the ability to share a room/switchboard with others.

Once a room/switchboard is shared, it can be used directly from the secondary user's phone app.

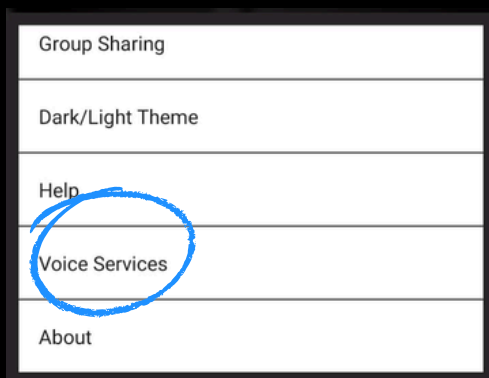

# LOCAL CONTROL

Our App was primarily built to offer remote connectivity to Our devices. However, when both the phone and the device are connected to the same Wi-Fi network, controlling the device locally is much faster, more reliable, and cost-effective, as there is no need to communicate with the cloud or rely on internet connectivity.

# VOICE ASSISTANT INTEGRATION

Any smart home system is not complete without Voice assistant integrations. We supports integration with Amazon Alexa and Google Voice Assistant (GVA), allowing users to control their appliances using voice commands.

## Smart Remote Control

- Master Off All Switches
- Ergonomic Design
- RGB Backlight Control
- Humming Less FAN Speed Control
- Wi-Fi Reset
- Factory Reset

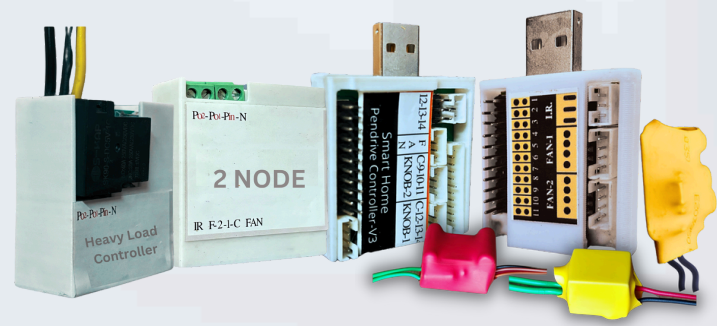

powered by 

# Retrofit Switches (Backend Devices)

World's First USB Powered Retrofit Module

*" Turn your existing switches into smart switches  
without re-wiring or breaking of walls "*

Sr. No.	Model	MRP
1.	1 Switch	4450
2.	2 Switch/RGB/Curtain Control	4450
3.	2 Switch & 1 Fan Control	5070
4.	5 Switch & 1 Fan Control	6905
5.	6 Switch Control	6445
6.	8 Switch & 1 Fan Control	8585
7.	8 Switch & 2 Fan Control	9205
8.	11 Switch & 1 Fan Control	9065
9.	14 Switch Control	8925

powered by  aws

# FEATURES

## Phone Control

Control all your existing appliances while sitting on the Sofa.

## Remote Control

Control all your existing appliances With IR Remote.

## Schedule Control

Automatically control your appliances and create a tension free schedule for them.

## Easy Reparable

Enjoy life long home automation.

## Voice Control

Now with your voice you can control all your appliances.

## Custom Scene

Create a party mood or romantic atmosphere on a single click.

## Share Feature

Share App with your family & start controlling together.

## No Hub Required

No External hub is required, our module will connect directly to your wi-fi router.

## Fan Speed Control

Control with your Phone/remote & Voice 4 step noise less speed of your existing Fan.

## Offline Mode

In Local Network, our App works perfectly even without internet.

## Memory Function

If electricity is gone & when it comes back it will maintain its previous state.

## OTA Update

We provides a interface to upgrade the firmware on the device remotely.

Now Give Your Home A **LUXURY** Feel  
With Smart Touch Switchboard
